Privacy Notice and User Agreement

Effective November 7, 2026 | Version 1.5 | Operator: Bay Oracle

Privacy contact: bayoracle@protonmail.com

1. Introduction

This BaySpace Privacy Notice and User Agreement (“Agreement”) governs access to and use of BaySpace, a members-based social media, profile, posting, voting, archive, and content-discovery platform operated by Bay Oracle (“BaySpace,” “Bay Oracle,” “we,” “us,” or “our”).

Guests can visit the BaySpace home page, browse public articles in Conspiracy Theories and Current Events, and view public areas such as Polls and the How To guide. Members can use the Briefing Room to reach their account tools, participate in eligible votes and discussions, use Black Light, and submit content where they have permission.

This Agreement explains what information BaySpace collects, how that information is used, what may be visible to other users or the public, how anonymous, incognito, ghost-author, and pen-name display features work, what rights and controls users may have, and what limitations apply to privacy, moderation, deletion, account recovery, saved posts, votes, profile visibility, platform security, and future features.

BaySpace is designed to avoid unnecessary identity collection. Ordinary users are not required to provide a legal name, phone number, or email address unless a future feature specifically requires it. However, BaySpace must collect and store certain information to operate accounts, preserve posts, manage sessions, enforce permissions, display profiles, moderate content, secure the platform, and maintain reliability.

By creating an account, logging in, submitting content, saving posts, voting, visiting profiles, using member-only areas, or otherwise accessing or using BaySpace, you acknowledge that you have read, understood, and agree to this Agreement.

If you do not agree to this Agreement, do not use BaySpace.

2. Eligibility

BaySpace is not directed toward children and is intended only for users age 18 or older.

You may not use BaySpace if you are under 18 years old.

By creating an account or using BaySpace, you represent that you are at least 18 years old and have the legal capacity to enter into this Agreement.

If BaySpace learns that it has collected information from a person under 18 in violation of this Agreement, BaySpace may delete the account and related information where appropriate.

3. Account Creation And Member Identity

BaySpace may allow users to create accounts using a username, reference name, account name, display name, member number, PIN, recovery phrase, access code, gate key, or other platform-specific credentials.

When you create or maintain an account, BaySpace may collect and store:

- username, reference name, account name, or display name;
- member number;
- account type, role, title, or posting permissions;
- public profile information voluntarily provided by you;
- email address, if voluntarily provided;
- birthday month, day, and year, if voluntarily provided. The Birthday stamp uses a saved month and day;
- public links voluntarily provided by you, including links to X, LinkedIn, GitHub, YouTube, or similar services;
- whether a public link should be displayed on your profile;
- account creation date;
- account update timestamps;
- account status;
- agreement acceptance timestamp and agreement version;
- account roles, access gates, posting permissions, or platform privileges.

BaySpace may also store participation and progression records associated with your account. These can include available and lifetime points, Bayo Coins, tokens, rank, vote tickets, daily spin activity, and the stamps, cards, badges, or gate keys you earn or acquire.

BaySpace may assign or preserve member numbers as part of its identity system. Member numbers may be retired, reserved, preserved, or withheld from reassignment at BaySpace’s discretion.

You are responsible for maintaining the confidentiality of your login credentials and for all activity occurring through your account.

4. Account Types, Roles, And Posting Permissions

BaySpace may offer different account types, roles, titles, permissions, or access levels. These may include, without limitation:

- Curious Reader;
- Author - Daily Food;
- Author - Theories;
- Influencer - Daily Food;

- Influencer - Theories;
- BAYO CLUB;
- administrator, moderator, operator, or internal platform roles.

Account type may affect whether you can post, where you can post, whether you can access certain sections, whether anonymous or incognito display options are available, and whether you must satisfy additional access gates.

New members start on the Reader track. Lifetime points count toward point-based rank promotions, including the first Poster rank at 1,000 lifetime points. Available points are the spendable balance. Exchange can convert eligible balances into Bayo Coins or tokens and show the cost or reward for an unlock. Posting, Poll and Weekly Quiz authorship, and other tools can have separate permissions.

Curious Reader accounts may read or reveal available content but may not have posting access.

Author - Daily Food accounts may post in Daily Food and may be allowed to use anonymous, incognito, ghost-author, or pen-name display options.

Author - Theories accounts may post in Theories and may be allowed to use anonymous, incognito, ghost-author, or pen-name display options.

Influencer - Daily Food accounts may post in Daily Food and Library, subject to access requirements, platform rules, and moderation. Anonymous or incognito options may be unavailable for this role.

Influencer - Theories accounts may post in Theories and Library, subject to access requirements, platform rules, and moderation. Anonymous or incognito options may be unavailable for this role.

BAYO CLUB accounts may have broader posting access to Daily Food, Theories, and Library and may be allowed to use anonymous, incognito, ghost-author, or pen-name display options.

BaySpace may require prescreen passwords, creator codes, gate keys, invitation credentials, approval steps, or other access checks for certain account types.

BaySpace may modify, restrict, suspend, remove, revoke, or change account types, permissions, roles, access gates, or posting privileges at any time.

5. Authentication, Pins, Sessions, And Account Security

BaySpace may collect information necessary to authenticate users, complete signup, and maintain sessions, including:

- member number or login identifier;
- PIN authentication data in protected hashed form;
- PIN salt or similar security material;
- signup draft information during account creation;
- session tokens in protected hashed form;
- session creation time;
- session expiration time;
- logout or revocation status;

- access-code or gate-key validation state, if applicable.

BaySpace should not store plaintext PINs. Authentication credentials should be protected server-side using reasonable technical safeguards.

BaySpace may use cookies, sessions, browser storage, and server-side authentication systems to keep users logged in, authenticate requests, prevent unauthorized access, preserve signup drafts, and maintain platform security.

Session cookies used for authentication should be protected through appropriate technical controls, such as HttpOnly, SameSite, and Secure settings where applicable.

No system is perfectly secure. BaySpace cannot guarantee absolute security, uninterrupted access, error-free operation, or complete protection against unauthorized access.

You are responsible for keeping your member number, PIN, recovery phrase, and other credentials secure.

6. No-Email Signup And Account Recovery

BaySpace may allow users to create accounts without providing an email address.

This protects user choice and reduces unnecessary identity collection, but it also limits account recovery.

If you create an account without providing recovery information, you are responsible for preserving your member number, PIN, recovery phrase, or other login credentials.

BaySpace may be unable to restore account access if you lose your member number, PIN, recovery phrase, recovery information, or other credentials.

BaySpace may refuse account recovery requests where ownership cannot be reasonably verified.

7. User Content

BaySpace stores content submitted by users. This may include:

- posts;
- Current Events submissions;
- Conspiracy Theories submissions;
- Library submissions;
- Top Story submissions;
- post titles;
- post body text;
- links and sources;
- tags, categories, or metadata;
- shelf labels;
- shelf codes;
- anonymous, incognito, ghost-author, or pen-name display settings;

- author or member references;
- timestamps;
- saved-post records;
- ticket vote counts;
- moderation status and moderation records.

Depending on the feature you use, BaySpace also stores submitted comments, Inbox messages and their sender and recipient records, and Poll or Weekly Quiz material. A draft can be processed in the browser, saved to a shared author draft where the feature supports it, or stored after submission. Check the action shown before submitting.

User content is central to BaySpace. You should not submit information that you wish to keep private unless BaySpace clearly provides a private feature for that specific purpose.

You are solely responsible for the content you submit, the links you share, and the profile information you display.

8. License To User Content

By submitting, posting, uploading, displaying, linking, storing, or otherwise providing content to BaySpace, you grant BaySpace a non-exclusive, worldwide, royalty-free, transferable, sublicensable license to host, store, reproduce, display, publish, distribute, modify for formatting or technical purposes, index, moderate, archive, transmit, and otherwise use your content as reasonably necessary to operate, improve, secure, promote, and provide BaySpace.

This license allows BaySpace to display your posts, operate feeds, preserve archives, support profiles, manage Library content, process reports, enforce rules, maintain backups, and operate present or future platform features.

You represent that you have the rights necessary to submit your content and grant this license.

You retain ownership of any rights you hold in your content, subject to the rights granted in this Agreement.

9. Public, Member-Visible, And Platform-Visible Information

BaySpace is a social and archival platform. Certain information may be visible to other users, members, administrators, platform operators, or the public.

Depending on account type, post settings, section rules, profile settings, and platform design, visible information may include:

- username or reference name;
- member number;
- display title;
- account type or author type;
- profile fields voluntarily displayed by the user;
- public links voluntarily displayed by the user;

- posts;
- links and sources submitted by the user;
- shelf labels or shelf codes;
- post timestamps;
- public author identity;
- anonymous, incognito, ghost-author, or pen-name display identity;
- ticket vote counts;
- saved-post or favorite counts in aggregate;
- profile visit counts;
- visible moderation status, if applicable.

Users should assume that anything posted to BaySpace may be seen by other users or the public if that area of the platform is public or member-visible.

Users should assume that public posts, usernames, profile information, and visible content may be indexed, copied, archived, screenshotted, reposted, quoted, cached, discussed, or distributed outside BaySpace.

Do not post private personal information, confidential information, sensitive identity details, passwords, financial information, medical information, private addresses, or anything you do not want other users, the public, platform administrators, hosting providers, database providers, or legal processes to see.

10. Public Profiles

BaySpace may provide public or member-visible profile pages. A profile may display:

- member number;
- name or username;
- reference name;
- title;
- BAYO CLUB or other role indicators;
- public links selected by the user;
- visible non-anonymous, non-incognito posts by that member;
- profile visit counts;
- saved or favorite counts associated with visible posts;
- ticket vote counts associated with visible posts.

Users should assume public profile information may be visible to anyone who can access the profile page.

BaySpace may modify, restrict, hide, remove, redesign, or discontinue public profile features at any time.

11. Favorites, Votes, Polls, And Quizzes

BaySpace may allow users to save posts, view saved-post counts, favorite authors, and vote on Current Events articles or other eligible items.

BaySpace may store saved-post records server-side. Favorite-author preferences may be stored locally in the user's browser. Ticket vote counts may be stored with post metadata, and ticket vote cooldown information may be stored server-side for logged-in users and locally in the browser for interface convenience.

These features may reveal aggregate activity, such as how many times a post has been saved or voted on.

BaySpace may use these records to operate counters, prevent abuse, enforce cooldown periods, rank or organize content, support future features, or maintain platform integrity.

Current Events articles can have separate Truth and Relevance / Importance ratings. BaySpace records the value linked to an eligible member's vote so the service can apply or remove that vote and calculate aggregate results. The interface may show the distribution of other votes after a member votes.

Poll records can include the question, options, the member's selection, and any applicable in-site fee or wager. Weekly Quiz records can include author drafts, answers submitted by members, scores, and point rewards. BaySpace uses these records to run the features, apply limits, and determine results or progression.

BaySpace may modify, suspend, reset, remove, or restrict saved-post, favorite-author, or voting features at any time.

12. Platform Sections And Member Tools

BaySpace organizes content into sections. Sections include Conspiracy Theories, Current Events, Top Story, Polls, and Library. The Briefing Room brings together member options, the Daily Spin, posting shortcuts, Circles, Black Light, Exchange, and account balances and rank.

Current Events and Top Story may display articles, sources, categories, author information, comments, and community ratings.

Conspiracy Theories may contain user theories, analysis, sources, and related metadata. This material may be speculative. Users should distinguish theory from fact.

Library may contain submissions, source material, shelf labels, shelf codes, references, archive-style posts, metadata, links, and related materials. Library content may support search, indexing, tags, references, codes, or future AI-assisted retrieval features.

The Library includes the How To guide and may host contributions and archives. Members can reach the Weekly Quiz, Inbox, Favorites, Stats, My Posts, ID Card, Profile, and Settings from Briefing Room options. Access can depend on account status and permissions.

BaySpace may add, rename, remove, reorganize, combine, restrict, archive, or discontinue sections as the platform develops.

13. Anonymous, Incognito, Ghost-Author, And Pen-Name Features

BaySpace may allow anonymous, incognito, ghost-author, or pen-name posting features.

These features are display features. They may affect how a post appears to other users, public viewers, member-visible pages, or public profile pages. They do not guarantee absolute anonymity.

Anonymous, incognito, ghost-author, and pen-name features are intended primarily as public-display controls, not as guarantees of invisibility or untraceable identity.

These features are designed to allow users to step out of the public spotlight, reduce attention toward a visible profile, or separate a post from a public-facing identity if a post receives unexpected visibility, attention, or discussion.

BaySpace administrators and limited authorized BAYO account operators may still retain the ability to internally view, review, associate, moderate, investigate, secure, or manage the originating account connected to anonymous or incognito content where necessary for platform operation, moderation, abuse prevention, technical administration, security, or legal compliance.

Access to internal anonymous-post association tools is restricted to a limited number of authorized BAYO-related accounts and administrative systems.

Anonymous display features should not be interpreted as a promise that content is permanently untraceable to platform operators, administrators, internal moderation systems, hosting providers, database providers, logs, backups, or legal processes.

BaySpace may still retain internal technical records necessary to:

- operate the account;
- connect content to the posting account internally;
- enforce platform rules;
- investigate abuse;
- prevent impersonation;
- protect users;
- comply with legal obligations;
- maintain platform security;
- moderate content.

Changing a post’s anonymous status or using an incognito shelf label changes public display only. It may not erase prior records, cached displays, logs, screenshots, moderation records, internal associations, external copies, or backups.

14. Browser Storage, Cookies, And Local State

BaySpace may use cookies, session mechanisms, and limited browser storage to operate the platform.

Cookies and sessions may be used to:

- keep users logged in;
- authenticate requests;
- protect accounts;
- prevent unauthorized access;
- preserve signup drafts during account creation;
- maintain platform security.

BaySpace may use browser local storage for interface preferences, temporary convenience features, and non-authoritative state, including:

- active member display state;
- open post drafts;
- favorite author lists;
- ticket vote cooldown display state;
- post-store update signals;
- cached UI state.

The current BaySpace Circles tools use browser storage for circle details and connections. Clearing browser storage or changing devices may affect access to that local data.

Browser local storage is not guaranteed to be secure or permanent. Clearing browser storage, switching devices, using private browsing, or changing browsers may remove local preferences or drafts.

BaySpace should not use browser local storage as the authoritative source for login authority, account permissions, server-side posts, server-side saved posts, moderation state, or account ownership.

15. Infrastructure And Service Providers

BaySpace may use third-party infrastructure providers to host, store, secure, deploy, transmit, cache, back up, and operate the platform.

Infrastructure may include:

- web hosting services;
- database services;
- serverless deployment services;
- logging and reliability systems;
- security systems;
- storage systems;
- analytics systems, if later added;
- abuse-prevention systems, if later added.

BaySpace may use services such as Supabase/Postgres for persistent platform records and Vercel or similar providers for hosting and deployment. Infrastructure choices may change as the platform develops.

Third-party providers may process, store, cache, secure, transmit, or back up platform data as part of normal technical operation.

BaySpace does not sell user personal information to advertisers, data brokers, or third parties for monetary compensation.

16. Technical And Security Information

BaySpace may collect technical information necessary to operate and protect the platform, including:

- IP address;
- browser type;
- device information;
- operating system information;
- request timestamps;
- server logs;
- error logs;
- authentication logs;
- abuse-prevention records;
- security events;
- moderation-related events.

This information may be used to protect BaySpace against spam, abuse, unauthorized access, technical failure, security incidents, and misuse of platform features.

BaySpace may use reasonable technical and organizational measures to protect the platform and user information. These may include:

- server-side credential handling;
- salted and hashed PINs;
- protected session tokens;
- secure cookies;
- server-side permission checks;
- database access controls;
- restricted administrative access;
- logging and monitoring;
- moderation tools;
- abuse-prevention systems.

No method of transmission, storage, authentication, hosting, or platform operation is completely secure.

17. How BaySpace Uses Information

BaySpace may use collected information to:

- create accounts;
- assign and preserve member numbers;
- authenticate users;
- maintain secure login sessions;
- complete signup flows;
- record agreement acceptance;
- display user profiles and posts;
- display public profile links selected by users;
- count profile visits;
- enforce account-type permissions;
- determine whether a user may post in a given section;
- determine whether anonymous or incognito display options are available;
- store and retrieve posts;
- organize content by section, category, shelf, tag, code, or source;
- operate Current Events, Conspiracy Theories, Library, Top Story, Polls, Weekly Quiz, and other areas;
- operate saved posts and favorite-related features;
- operate article ratings, ticket votes, cooldowns, vote counters, member progression, and Exchange;
- process reports if reporting tools are available;
- review and moderate content;
- prevent spam, fraud, abuse, impersonation, and unauthorized access;
- diagnose technical problems;
- preserve platform reliability;
- maintain security logs;
- comply with legal obligations;
- enforce BaySpace rules, terms, and policies;
- protect users, administrators, systems, and the platform.

18. User Responsibilities And Prohibited Conduct

Users are responsible for the content they submit, the links they share, and the profile information they display.

You agree not to use BaySpace to:

- impersonate another person or entity;
- post unlawful, threatening, abusive, harassing, defamatory, invasive, or harmful content;
- post another person’s private information without permission;

- post malware, phishing links, spam, scams, or deceptive material;
- interfere with platform security or access controls;
- abuse voting, saved-post, profile, posting, or moderation features;
- attempt to access accounts, systems, administrative tools, databases, or areas without authorization;
- scrape, copy, harvest, or misuse platform data in violation of this Agreement;
- evade bans, suspensions, restrictions, or moderation actions;
- misrepresent source material or manipulate platform features;
- use BaySpace in a way that violates applicable law;
- use BaySpace in a way that harms BaySpace, other users, or platform integrity.

BaySpace may remove content or restrict accounts that violate this Agreement or harm the platform.

19. Moderation, Reports, And Enforcement

BaySpace may review, restrict, hide, remove, preserve, or report content when necessary to operate and protect the platform.

BaySpace may process reports and moderation records involving:

- user posts;
- accounts;
- profile information;
- links;
- comments;
- spam;
- abuse;
- threats;
- harassment;
- impersonation;
- illegal content;
- security incidents;
- platform misuse.

BaySpace may take enforcement action, including:

- removing posts;
- hiding posts;
- flagging posts;
- restricting accounts;
- suspending accounts;
- banning accounts;
- changing roles or permissions;

- preserving records related to abuse or security;
- reporting content where legally required or appropriate.

BaySpace reserves the right, but not the obligation, to moderate, remove, restrict, preserve, or review content, accounts, or platform activity.

BaySpace is not obligated to review all content before it appears. Moderation may be reactive, selective, automated, manual, or a combination of these approaches.

20. Accuracy Of User Content

BaySpace hosts user-generated content.

Unless BaySpace expressly states otherwise, BaySpace does not verify, endorse, guarantee, or adopt user posts as accurate, complete, current, lawful, reliable, safe, or suitable.

This applies to all sections, including Current Events, Conspiracy Theories, Library, Top Story, profiles, links, source submissions, and user discussions.

Users are responsible for what they post. Users should independently verify important information before relying on it.

Users access and use BaySpace and user-generated content at their own risk.

21. No Professional Advice

BaySpace is a social media, profile, posting, voting, and archive platform.

BaySpace does not provide:

- medical advice;
- mental-health treatment;
- psychological counseling;
- legal advice;
- financial advice;
- emergency services;
- crisis intervention;
- professional diagnosis;
- professional verification of user claims.

User posts may discuss serious topics, but BaySpace does not transform user-generated content into professional advice.

If a user needs emergency help, legal advice, medical assistance, mental-health care, or professional guidance, the user should contact qualified professionals or emergency services.

Users access and use BaySpace and user-generated content at their own risk.

22. Black Light And Assisted Tools

Black Light is the in-site workspace for Thiago. Owl answers questions about BaySpace and can use signed-in account details such as rank, balances, and progression. Investigate uses available BaySpace articles and their listed sources. Format helps put supplied material into the shape Paste & Go expects.

Paste & Go accepts supported article, Poll, and Weekly Quiz drafts. Depending on the workflow, BaySpace can show a preview or add an eligible question to a shared quiz draft after you submit it. Published content and draft submissions remain subject to account permissions and platform rules. Review supplied facts, sources, and text before submitting.

These in-site tools use the material available to BaySpace. The current Investigate tool does not independently search the live web. Some article shortcuts may open a separate external service and may copy the article link for you to paste. See section 26 for third-party tools. Check where you are sending information before sharing a draft or any personal details.

BaySpace may add search, retrieval, summarization, recommendation, or other assisted features. BaySpace will update this Agreement or provide a separate notice before introducing features that materially change how it processes user content. Assisted output can be incomplete, inaccurate, outdated, biased, or misleading. Verify original sources and do not treat assisted output as professional advice.

23. Data Retention

BaySpace retains information for as long as reasonably necessary to operate the platform and fulfill the purposes described in this Agreement.

BaySpace may retain information to:

- maintain accounts;
- preserve posts;
- display content;
- operate public profiles;
- operate saved posts;
- operate ticket votes and cooldowns;
- process reports;
- maintain moderation records;
- enforce platform rules;
- investigate abuse;
- secure the platform;
- comply with legal obligations;
- resolve disputes;
- maintain backups and logs;
- preserve platform integrity.

Deleted content may remain for a limited time in backups, logs, cache layers, moderation records, security records, analytics records if later added, or legal-preservation systems.

BaySpace may retain certain records even after account deletion where necessary for security, legal compliance, abuse prevention, moderation, platform integrity, dispute resolution, or legitimate platform operations.

24. Post Deletion, Account Wipe, And Account Deletion

BaySpace may allow users to delete individual posts, wipe account content, or delete accounts, depending on available platform features.

Post deletion may remove a post from ordinary display but may not immediately remove all related records from backups, logs, caches, moderation history, security systems, saved-post records, counters, or legal-preservation records.

An account wipe may remove or hide posts associated with an account while leaving the member account active.

Account deletion may retire the member number, mark the account deleted, and remove or hide associated posts from ordinary display.

BaySpace may refuse to reassign retired member numbers.

Deletion, wiping, or hiding may not remove:

- backups;
- logs;
- moderation history;
- security records;
- cached systems;
- saved-post records;
- aggregate counters;
- legal-preservation records;
- records needed to prevent abuse or enforce bans.

25. User Choices And Controls

Depending on available features, users may be able to:

- update profile fields;
- provide or remove optional email information;
- provide or remove optional birthday details;
- add public links;
- choose whether public links display on their profile;
- choose account type during signup;
- choose what to post;

- use anonymous, incognito, ghost-author, or pen-name display modes where available;
- delete posts;
- wipe account posts;
- delete accounts;
- save or unsave posts;
- favorite authors locally in the browser;
- rate eligible Current Events articles and participate in eligible polls or quizzes;
- avoid posting personal information;
- contact BaySpace with privacy questions.

Some choices may be limited by platform integrity, moderation needs, technical constraints, legal obligations, anti-abuse requirements, available platform features, or account status.

26. Third-Party Links And Tools

BaySpace may display links submitted by users, links to external profiles, source links, and links to third-party tools or services.

Users may choose to open external links, including public profile links, source links, or external assistant tools such as the service opened by the article flashlight.

BaySpace is not responsible for third-party websites, tools, services, privacy practices, terms, content, security, or accuracy.

Use of third-party services may be governed by those third parties' terms and privacy policies.

Users should not submit sensitive information to third-party services through BaySpace unless they understand and accept the third party's practices.

27. Platform Changes, Suspension, And Availability

BaySpace may modify, suspend, discontinue, restrict, or remove features, sections, accounts, roles, permissions, content, or platform access at any time.

BaySpace does not guarantee that any feature, section, account type, post, profile, vote count, saved-post record, archive, or platform function will remain available permanently.

BaySpace may experience interruptions, downtime, errors, data loss, deployment issues, security events, maintenance periods, or other disruptions.

BaySpace is not liable for unavailability, interruptions, feature changes, account restrictions, content removal, or platform modifications except where prohibited by applicable law.

28. Privacy Rights

Depending on where you live and which laws apply, you may have rights to request access, correction, deletion, portability, restriction, objection, or information about how your personal information is used.

BaySpace will review privacy requests according to applicable law, user verification, platform security, and technical feasibility.

Requests may be sent to:

bayoracle@protonmail.com

BaySpace may decline or limit requests where required or permitted by law, including where necessary to protect security, prevent fraud, preserve evidence, complete transactions, maintain moderation records, enforce platform rules, comply with legal obligations, or protect the rights and safety of BaySpace or others.

29. California And Other Regional Privacy Rights

If applicable privacy laws provide specific rights to users in California or other jurisdictions, BaySpace will respond to eligible requests as required by applicable law.

BaySpace does not sell user personal information to advertisers, data brokers, or third parties for monetary compensation.

If BaySpace later introduces advertising, analytics, tracking, data-sharing, or other features that materially affect user privacy rights, BaySpace may update this Agreement or provide additional notices as required.

30. Disclaimers

BaySpace is provided on an “as is” and “as available” basis.

To the fullest extent permitted by law, BaySpace disclaims all warranties, express or implied, including warranties of merchantability, fitness for a particular purpose, title, non-infringement, accuracy, reliability, availability, security, and uninterrupted operation.

BaySpace does not guarantee that the platform will be secure, error-free, uninterrupted, accurate, complete, current, or free of harmful components.

BaySpace does not guarantee that user content is truthful, lawful, safe, useful, or reliable.

31. Limitation Of Liability

To the fullest extent permitted by law, BaySpace, Bay Oracle, its operators, administrators, service providers, contractors, representatives, and affiliates shall not be liable for indirect, incidental, consequential, special, punitive, exemplary, or similar damages arising out of or related to the use of BaySpace.

This includes, without limitation, damages for loss of data, loss of account access, loss of content, reputational harm, lost profits, security incidents, reliance on user content, platform interruptions, moderation decisions, content removal, account restrictions, or third-party conduct.

Some jurisdictions do not allow certain limitations of liability, so some limitations may not apply to you.

32. Indemnification

You agree to defend, indemnify, and hold harmless BaySpace, Bay Oracle, its operators, administrators, service providers, contractors, representatives, and affiliates from and against any claims, damages, liabilities, losses, costs, and expenses, including reasonable attorneys' fees, arising out of or related to:

- your use of BaySpace;
- your content;
- your violation of this Agreement;
- your violation of law;
- your violation of another person's rights;
- your misuse of platform features;
- your unauthorized access or attempted access to accounts, systems, or data.

33. Governing Law

This Agreement shall be governed by applicable laws and legal requirements associated with BaySpace operations, without regard to conflict-of-law principles.

Where legally required, mandatory consumer protection laws in a user's jurisdiction may apply.

34. Dispute Resolution

Before initiating formal legal proceedings, users agree to contact BaySpace at bayoracle@protonmail.com and attempt in good faith to resolve any dispute informally.

BaySpace may also contact users through available account or contact information where appropriate.

Nothing in this section prevents BaySpace from taking immediate action to protect the platform, users, systems, security, records, intellectual property, or legal rights.

35. Changes To This Agreement

BaySpace may update this Privacy Notice and User Agreement from time to time.

When changes are made, BaySpace will update the effective date, version number, or both.

Continued use of BaySpace after an updated Agreement becomes effective means the updated Agreement applies to continued use of the platform.

Material changes may be announced through the platform where appropriate.

BaySpace may require users to accept an updated Agreement before continuing to use certain features.

36. Contact

Questions, requests, privacy concerns, or account-related issues may be sent to:

bayoracle@protonmail.com

The Briefing Room Settings page also lists bayoadmin@protonmail.com for account support. Use the privacy contact above for privacy requests.

37. Acceptance

By creating an account, logging in, submitting content, saving posts, voting, visiting profiles, using member-only areas, or otherwise accessing BaySpace, you acknowledge and agree that:

- you are at least 18 years old;
- you have read and understood this Agreement;
- you agree to be bound by this Agreement;
- you understand that BaySpace is a social and archival platform;
- you understand that anonymous, incognito, ghost-author, and pen-name features are public-display controls and not guarantees of absolute anonymity;
- you understand that authorized BaySpace administrators and limited BAYO account operators may internally associate anonymous or incognito content with originating accounts where necessary;
- you understand that public content may be copied, archived, indexed, screenshotted, or discussed outside BaySpace;
- you are responsible for your account credentials and user content;
- you use BaySpace at your own risk.
