

BaySpace Privacy Notice and user agreement

Effective Date: May 15, 2026

Version: 1.3

Privacy Contact: bayoracle@protonmail.com

Operator: Bay Oracle

Platform: BaySpace

BaySpace is a members-based social media and archive platform developed by Bay Oracle. BaySpace allows users to create accounts, enter a member-access platform, read content, and, depending on account type, post user-generated material into designated sections including **Top News**, **Daily Food**, **Theories**, and **Library**.

This Privacy Notice explains what information BaySpace collects, how that information is used, what may be visible to other users, how ghost or pen-name posting works, and what limitations apply to privacy, account recovery, deletion, moderation, and future platform features.

BaySpace is designed to avoid unnecessary identity collection. BaySpace does not require ordinary users to provide a real legal name, phone number, or email address to participate unless a future feature specifically requires it. However, BaySpace must still collect and store certain information in order to operate accounts, preserve posts, manage sessions, enforce posting permissions, moderate content, secure the platform, and maintain reliability.

1. Information BaySpace Collects

BaySpace collects information that is necessary to operate the platform and information that users voluntarily provide.

1.1 Account Information

When a user creates or maintains an account, BaySpace may collect and store:

- username, reference name, or account name;
- member number;
- account type;
- display title or profile title;
- public or profile information voluntarily provided by the user;
- email address, if voluntarily provided;
- birthday month and birthday year, if voluntarily provided;
- public links voluntarily provided by the user;
- account creation date;
- account update timestamps;
- account status;

- account roles or permissions.

BaySpace account types may include:

- **Reader;**
- **Ghost Author — Theories;**
- **Ghost Author — News;**
- **Influencer — Theories;**
- **Influencer — News.**

Account type affects platform permissions, including whether a user may post and where a user may post.

1.2 Authentication and Session Information

BaySpace may collect information necessary to authenticate users and maintain sessions, including:

- member number or login identifier;
- PIN authentication data in protected hashed form;
- PIN salt or similar security material;
- recovery-related information, if offered and voluntarily provided;
- session tokens in protected hashed form;
- session creation time;
- session expiration time;
- logout or revocation status.

BaySpace should not store plaintext PINs. Authentication credentials should be protected server-side and should not be stored in browser local storage as the source of account authority.

1.3 User Content

BaySpace stores content submitted by users. This may include:

- posts;
- comments, if comments are enabled;
- Top News submissions;
- Daily Food submissions;
- Theories submissions;
- Library submissions;
- titles;
- body text;

- links;
- shelf labels;
- shelf codes;
- metadata associated with a post;
- timestamps;
- saved posts;
- reports;
- moderation records.

User content is central to BaySpace. Users should not submit information they wish to keep private unless the platform clearly provides a private feature for that specific purpose.

1.4 Technical and Security Information

BaySpace may collect technical information necessary to operate and protect the platform, including:

- IP address;
- browser type;
- device information;
- operating system information;
- request timestamps;
- server logs;
- error logs;
- authentication logs;
- abuse-prevention records;
- security events;
- moderation-related events.

This information may be used to protect BaySpace against spam, abuse, unauthorized access, technical failure, and misuse of platform features.

2. How BaySpace Uses Information

BaySpace uses collected information to operate the platform and preserve the integrity of the shared member environment.

BaySpace may use information to:

- create accounts;
- assign and preserve member numbers;
- authenticate users;

- maintain secure login sessions;
- display user profiles and posts;
- enforce account-type permissions;
- determine whether a user may post in a given section;
- store and retrieve posts;
- organize content by section;
- operate Top News, Daily Food, Theories, and Library;
- maintain saved posts;
- process user reports;
- review and moderate content;
- prevent spam, fraud, abuse, impersonation, and unauthorized access;
- diagnose technical problems;
- preserve platform reliability;
- maintain security logs;
- comply with legal obligations;
- enforce BaySpace rules, terms, and policies.

3. Public, Member-Visible, and Platform-Visible Information

BaySpace is a social and archival platform. Certain information may be visible to other users.

Depending on account type, post settings, section rules, and platform design, visible information may include:

- username or reference name;
- member number;
- display title;
- account type or author type;
- profile fields voluntarily displayed by the user;
- posts;
- comments;
- links submitted by the user;
- shelf labels or shelf codes;
- post timestamps;
- public author identity;
- pen-name identity;
- visible moderation status, if applicable.

Users should assume that anything posted to BaySpace may be seen by other users who are permitted to access that area of the platform.

Do not post private personal information, confidential information, sensitive identity details, passwords, financial information, medical information, private addresses, or anything you do not want other users or platform administrators to see.

4. Account Types and Posting Visibility

BaySpace uses account types to determine posting permissions.

Reader

Reader accounts may read available platform content but may not post.

Ghost Author — Theories

Ghost Author — Theories accounts may post under a ghost, pen-name, or non-public-facing author identity in permitted areas, subject to platform rules.

Ghost Author — News

Ghost Author — News accounts may post under a ghost, pen-name, or non-public-facing author identity in permitted areas, subject to platform rules.

Influencer — Theories

Influencer — Theories accounts may post under an influencer/public-facing identity in permitted areas, subject to platform rules.

Influencer — News

Influencer — News accounts may post under an influencer/public-facing identity in permitted areas, subject to platform rules.

BaySpace may modify permissions, restrict posting, suspend accounts, or require approval for certain account types or sections.

5. Platform Sections

BaySpace organizes posts into primary sections.

Top News

Top News is a restricted posting section. Only influencer account types may post in Top News, subject to platform rules and moderation.

Daily Food

Daily Food may be posted to by posting-enabled accounts, subject to platform rules and moderation.

Theories

Theories may be posted to by posting-enabled accounts, subject to platform rules and moderation.

Library

Library may be posted to by posting-enabled accounts, subject to platform rules and moderation. Library content may later support search, indexing, references, tags, or AI-assisted retrieval features.

6. Ghost Author, Incognito, and Pen-Name Limitations

BaySpace may allow ghost author, incognito, or pen-name posting features.

These features are display features. They may affect how a post appears to other users. They do **not** guarantee absolute anonymity.

BaySpace may still retain internal technical records necessary to:

- operate the account;
- enforce platform rules;
- investigate abuse;
- prevent impersonation;
- protect users;
- comply with legal obligations;
- maintain platform security;
- moderate content.

Ghost, incognito, or pen-name use should not be treated as a guarantee that BaySpace administrators, technical systems, hosting providers, or legal processes can never associate an account with content.

7. Cookies, Sessions, and Browser Storage

BaySpace may use cookies, session mechanisms, and limited browser storage to operate the platform.

Cookies and Sessions

Cookies or session tokens may be used to:

- keep users logged in;
- authenticate requests;
- protect accounts;
- prevent unauthorized access;
- maintain platform security.

Session cookies used for authentication should be protected through appropriate technical controls, such as HttpOnly and Secure settings where applicable.

Local Storage

BaySpace may use browser local storage for harmless interface preferences or temporary convenience features, such as display settings or cached UI state.

BaySpace should not use browser local storage as the authoritative source for:

- user identity;
- login authority;
- member numbers;
- account permissions;
- posts;
- saved posts;
- roles;
- moderation state.

The authoritative version of account and platform records should live on BaySpace's server-side database or backend systems.

8. Infrastructure and Service Providers

BaySpace may use third-party infrastructure providers to host, store, secure, deploy, and operate the platform.

These providers may process information as necessary to provide technical services to BaySpace.

Current or planned infrastructure may include:

- web hosting services;
- database services;
- serverless deployment services;
- logging and reliability systems;
- security systems;
- storage systems.

BaySpace currently plans to use a backend database system such as Supabase/Postgres for persistent platform records. BaySpace may also use hosting services such as Vercel. Infrastructure choices may change as the platform develops.

BaySpace does not sell user personal information as part of its basic platform operation.

9. Moderation, Reports, and Enforcement

BaySpace may review, restrict, hide, remove, preserve, or report content when necessary to operate and protect the platform.

BaySpace may process reports and moderation records involving:

- user posts;
- accounts;
- profile information;
- links;
- comments, if enabled;
- spam;
- abuse;
- threats;
- harassment;
- impersonation;
- illegal content;
- security incidents;
- platform misuse.

BaySpace may take enforcement action, including:

- removing posts;
- hiding posts;
- flagging posts;

- restricting accounts;
- suspending accounts;
- banning accounts;
- preserving records related to abuse or security;
- reporting content where legally required or appropriate.

BaySpace is not obligated to review all content before it appears. Moderation may be reactive, selective, automated, manual, or a combination of these approaches.

10. Accuracy of User Content

BaySpace hosts user-generated content.

Unless BaySpace expressly states otherwise, BaySpace does not verify, endorse, guarantee, or adopt user posts as accurate, complete, current, lawful, or reliable.

This applies to all sections, including:

- Top News;
- Daily Food;
- Theories;
- Library.

Users are responsible for what they post. Users should independently verify important information before relying on it.

11. Library Content and Future AI Search

BaySpace may later include AI-assisted search or research features inside the Library tab.

If introduced, such features may help users search, summarize, retrieve, or navigate BaySpace content.

Future AI search may involve:

- Library submissions;
- post titles;
- post body text;
- shelf labels;
- shelf codes;
- tags;

- references;
- metadata;
- search queries;
- retrieval logs.

BaySpace will update this Privacy Notice or provide a separate notice before implementing AI features that materially change how user content is indexed, searched, summarized, or processed.

BaySpace should not use private or restricted user content for AI search without appropriate notice, controls, and platform rules.

AI-generated results, if later introduced, may be incomplete, inaccurate, or misleading. Users should verify original sources and should not treat AI output as professional advice.

12. No Professional Advice

BaySpace is a social media and archive platform.

BaySpace does not provide:

- medical advice;
- mental-health treatment;
- psychological counseling;
- legal advice;
- financial advice;
- emergency services;
- crisis intervention;
- professional diagnosis;
- professional verification of user claims.

User posts may discuss serious topics, but BaySpace does not transform user-generated content into professional advice.

If a user needs emergency help, legal advice, medical assistance, mental-health care, or professional guidance, they should contact qualified professionals or emergency services.

13. Data Retention

BaySpace retains information for as long as reasonably necessary to operate the platform and fulfill the purposes described in this Privacy Notice.

BaySpace may retain information to:

- maintain accounts;
- preserve posts;
- display content;
- operate saved posts;
- process reports;
- maintain moderation records;
- enforce platform rules;
- investigate abuse;
- secure the platform;
- comply with legal obligations;
- resolve disputes;
- maintain backups and logs.

Deleted content may remain for a limited time in backups, logs, cache layers, moderation records, security records, or legal-preservation systems.

BaySpace may retain certain records even after account deletion where necessary for security, legal compliance, abuse prevention, or legitimate platform operations.

14. Account Deletion and Post Deletion

BaySpace may allow users to delete posts, wipe account content, or delete accounts, depending on available platform features.

Deletion may affect visible platform content but may not immediately remove all records from:

- backups;
- logs;
- moderation history;
- security systems;
- cached systems;
- legal-preservation records.

If a user deletes an account, BaySpace may retire the member number and may refuse to reassign it.

BaySpace may preserve minimal records necessary to prevent abuse, enforce bans, preserve platform integrity, or comply with law.

15. No-Email Signup and Account Recovery

BaySpace may allow users to create accounts without email.

This protects user choice and reduces unnecessary identity collection, but it also limits recovery.

If a user creates an account without providing recovery information, the user is responsible for preserving their member number, PIN, recovery phrase, or other login credentials.

BaySpace may be unable to restore account access if credentials are lost.

BaySpace may refuse account recovery requests where ownership cannot be reasonably verified.

16. Children and Age Restrictions

BaySpace is not intended for anyone under 18.

Do not use BaySpace if you are under 18

If BaySpace learns that it has collected information from a child under 18 in violation of this policy, BaySpace may delete the account and related information where appropriate.

17. Security

BaySpace uses reasonable technical and organizational measures to protect the platform and user information.

These measures may include:

- server-side credential handling;
- salted and hashed PINs;
- protected session tokens;
- secure cookies;
- server-side permission checks;
- database access controls;
- restricted administrative access;
- logging and monitoring;
- moderation tools;
- abuse-prevention systems.

No system is perfectly secure. BaySpace cannot guarantee absolute security, uninterrupted access, or complete protection against unauthorized access.

Users are responsible for keeping their login credentials confidential.

18. User Choices and Controls

Depending on available features, users may be able to:

- update profile fields;
- choose account type;
- choose what to post;
- use pen-name or ghost author display modes;
- delete posts;
- save or unsave posts;
- report content;
- request account deletion;
- limit voluntarily provided information;
- avoid posting personal information;
- contact BaySpace with privacy questions.

Some choices may be limited by platform integrity, moderation needs, technical constraints, legal obligations, or anti-abuse requirements.

19. California and Other Privacy Rights

Depending on where a user lives and which laws apply, users may have rights to request access, correction, deletion, or information about how their personal information is used.

BaySpace will review privacy requests according to applicable law, user verification, platform security, and technical feasibility.

Requests may be sent to:

bayoracle@protonmail.com

BaySpace may decline or limit requests where required or permitted by law, including where necessary to protect security, prevent fraud, preserve evidence, complete transactions, maintain moderation records, or comply with legal obligations.

20. Changes to This Privacy Notice

BaySpace may update this Privacy Notice from time to time.

When changes are made, BaySpace will update the effective date, version number, or both.

Continued use of BaySpace after an updated notice becomes effective means the updated notice applies to continued use of the platform.

Material changes may be announced through the platform where appropriate.

21. Contact

Questions, requests, or privacy concerns may be sent to:
